

► Feature:

1. Fully digital design, greatly improved sound quality and anti-interference ability
2. With personal volume adjustment and automatic howling suppression functions
3. It has the function of eliminating cough, which can prevent the cough sound from coming out when the translator coughs.
4. When the speaker speaks too fast, you can press the request button (SLOW) to ask the speaker to slow down.
5. When the translator needs help, he can press the request button (Help) to request help.
6. The secondary translation function can be configured. When the translator cannot understand the speaker's language, he or she can perform a second translation by monitoring the transliteration of other translators.
7. Has direct broadcast function
8. Support 4, 8, 12, and 16 audio channels
9. Large color screen display, optional headset and microphone pole

► Specification:

Output frequency response	1. 30Hz-20KHz
Maximum power consumption	4.3W
Headphone load	>16Ω
Headset output interface	2*3.5mm on the left and right sides
Connection method	6-core wire hand in hand
Speaker power	4Ω 2W
