

► Feature:

1. Neodymium magnet full-band high-quality speaker unit
2. Aluminum alloy box, black brushed oxidation process
3. Solve the problems of traditional conference room speaker projection and interference through constant beam technology in line array column speakers.
4. In terms of sound performance, the speech amplification of human voices is very excellent.

► Specification:

Type	4x3" neodymium magnet full-band high-quality speaker unit
Frequency response range	100Hz-20KHz; (-10dB)
Nominal impedance	8Ω
Continuous power	80W
Peak power	320W
Sensitivity	97dB/1W/1m
Sound pressure level	118dB continuous, 124dB peak
Coverage angle (HxV)	100°x 80°
Wiring method	2x4pin Speakon
Cabinet	Aluminum alloy black brushed and oxidized; 3mm round perforated steel mesh
Size (WxHxD)	110x366x96mm
Weight	2.3Kg
