

Feature:

1. 2.8-inch color display screen, which can display signal, battery power, grouping, ID address number, speech timing, etc.
2. The unit panel is made of high-strength alloy metal panel, the microphone tube is made of a short square tube with a length of 230mm, and the tail is made of a delicate metal sign, which gives it a stronger sense of luxury and a beautiful appearance.
3. When the unit is in communication status, the blue light on the side of the pole is always bright, which is high-end and atmospheric.
4. High-definition vocal restoration, super-cardioid directivity, and unique battery life power supply technology.

Specification:

Carrier frequency band	UHF640MHz-690MHz
Oscillation mode	PLL phase locked frequency synthesis
Harmonic radiation	< -65dBm
Maximum offset	±45KHz
Bandwidth	50MHz
Channel spacing	125KHz
Spurious suppression	-60dB
Harmonic suppression	> 55dBc
Frequency stability	±0.005%
Microphone core	14mm condenser microphone core, supercardioid directivity
Batteries used	3 AA batteries (compatible with AA rechargeable batteries)
Dimensions	microphone pole length 230*width 37*height 26mm; base width 110*depth 140*height 60mm (excluding shaft)
